Hawthorn: The Heart’s Best Friend

Clinical trials in Europe suggest that to be effective Hawthorn leaf and flower extract should contain substantial levels of the important plant constituents: flavonoids and catechin polymers, also known as oligomeric procyanidins (OPCs). In these trials, Hawthorn leaf and flower extract was used to support cardiovascular health. Extracts of herbs may be ‘standardized’ – this means they must contain a certain amount of important constituents. Top quality Hawthorn leaf and flower extracts are standardized to contain a certain amount of catechin polymers (OPCs) and vitexin-2-rhamnoside (a flavonoid). There are more of these compounds in the leaf and flower of Hawthorn compared to the berry.

How MediHerb Hawthorn Keeps You Healthy

Hawthorn supports the healthy functioning of the heart muscle

Hawthorn leaf and flower extract supports the healthy functioning of the heart muscle. It may do this by helping to ensure a normal force of contraction and normal heart rate. Hawthorn products standardized for OPCs and flavonoids may enhance the efficiency of the heart and improve exercise tolerance (the heart’s response to exercise).

Hawthorn helps maintain healthy blood pressure and coronary blood flow

Hawthorn leaf and flower extract may also help maintain healthy blood pressure within a normal range and promote healthy blood flow through the heart. It may do this by helping the normal relaxation of the blood vessels of the heart.

Hawthorn provides antioxidant protection

Studies that investigate the effect of people’s diet on health have shown a link between the intake of flavonoids and reduced risk of cardiovascular diseases. This may be due to their antioxidant activities. (Antioxidants help protect cells from the damaging effects of excessive free radicals. Free radicals are highly reactive substances created in the body that may injure cells.) The beneficial cardiovascular effect of Hawthorn leaf and flower may be due to the antioxidant activity of its flavonoids and OPCs.

What Makes MediHerb Hawthorn Unique
Hawthorn from MediHerb is unique in the professional herbal products industry because:

- It states on the label exactly how much each tablet contains of the important plant constituents (catechin polymers and vitexin-2-rhamnoside)
- MediHerb tests the quantity of OPCs and vitexin-2-rhamnoside in Hawthorn raw material
- MediHerb’s testing also ensures the vitexin-2-rhamnoside is retained in the product throughout manufacture

Unique Manufacture & Analytical Testing
Quality and safety ensured

- Manufactured in Australia to the high standards of international pharmaceutical Good Manufacturing Practice
- Raw materials and finished product are subjected to tough quality standards, including use of the latest and most relevant chemical analysis methods

Quality is our Passion
MediHerb products are developed by experts and leaders in the field of herbal therapy, using scientific evidence and hundreds of years of traditional knowledge.

Kerry Bone and over 20 health care professionals work within MediHerb while still managing their own clinical practices, plus we consult with an advisory board of health care professionals from around the world.

Our products are made using only the highest quality ingredients which are extensively tested for purity and potency. The MediHerb manufacturing plant operates to a strictly regulated pharmaceutical standard and is regularly audited by the Therapeutic Goods Administration (similar to the FDA), the same body that audits conventional pharmaceutical manufacturing facilities. The comprehensive regulations in Australia mean that you receive a safe and effective product that has been manufactured to pharmaceutical standards.

We know from our experience as health care professionals that the quality of a product you take makes a huge difference to the health outcome you experience. We dedicate ourselves to researching and making the best possible products to deliver health solutions that work.
