PulmaCo: Clear Breathing Lung Support

PulmaCo is a unique combination of Chinese Skullcap root, leaf of Malabar Nut Tree, Grindelia herb, Turmeric rhizome, Fennel seed essential oil and a special, highly concentrated flavonoid extract manufactured from Ginkgo leaf. This formulation helps to support healthy lung function.

How PulmaCo Keeps You Healthy

Assists in maintaining healthy breathing passages to support free and clear breathing

The leaf of the Malabar Nut Tree has been used traditionally in India for over 2000 years. One of its most important uses is to assist in maintaining healthy breathing passages to support free and clear breathing.

Ginkgo is also used in China for the same application. It is thought that Ginkgo may help by providing anti-PAF activity. Platelet activating factor (PAF) is a phospholipid which is formed by platelets and white blood cells. It is a strong platelet aggregating agent. Anti-PAF activity is regarded as useful for respiratory system support.

Grindelia has been used traditionally to assist in maintaining healthy breathing passages to support free and clear breathing.

Supports a healthy respiratory tract

Turmeric and Baical Skullcap have been used traditionally to support a healthy respiratory tract. In the European tradition, Fennel seed essential oil has also been used orally to provide respiratory support.

Supports the body’s natural ability to break up and expel respiratory secretions

One of the ways leaf of Malabar Nut Tree helps is by supporting the body to break up and expel respiratory secretions. Uncontrolled trials conducted in India as early as 1925 support this action.

The traditional use of Fennel seed liquid extracts in supporting the body’s natural ability to break up and expel respiratory secretions is based on the properties of the essential oil. Grindelia has also been used to provide this activity.

A Phytotherapist’s Passion

“Philosopher and teacher Rudolf Steiner once said that, for every human illness, somewhere in the world there exists a plant which is the cure. I believe that there is a healing potential locked inside plants which is integral with their evolution, just as it is part of human evolution to learn to tap this wonderful gift of Nature.”

What Makes PulmaCo Unique

PulmaCo is unique in the professional herbal products industry because:

- The label states exactly how much each tablet contains of the important plant constituents (curcuminoids and ginkgo flavonglycosides)
- MediHerb tests raw materials for the quantity of:
  - flavonoids in Chinese Skullcap
  - curcuminoids in Turmeric
  - ginkgo flavonglycosides in Ginkgo
- MediHerb conducts extensive testing to ensure the correct species of Scutellaria is used for Chinese Skullcap raw material
- MediHerb’s testing also ensures the curcuminoids are retained in the product throughout manufacture

Unique Manufacture & Analytical Testing

Quality and safety ensured

- Manufactured in Australia to the high standards of international pharmaceutical Good Manufacturing Practice
- Raw materials and finished product are subjected to tough quality standards
