

# 10 DAY Blood Sugar Support Program

## Help Patients Reshape Their Lives in 10 Days

The 10-Day Blood Sugar Support Program is for patients who may experience:

- Cravings for carbs or sugar
- A shaky feeling between meals
- Low energy
- Fitful sleep
- Moodiness

This 10-day program supports a well-functioning blood sugar metabolism, which is the basis for good energy, quality sleep, an even mood, and a healthful appetite.\*

Two kit choices allow you to select the preferred protein for each patient. Each kit contains a diet plan, patient guide, and supplements. As always, patients should be closely evaluated before starting this program. And due to the low calorie counts, this program is not recommended for women who are pregnant or lactating.

Use this program to educate patients on ways to support a well-functioning blood sugar metabolism and create the foundation for a healthier lifestyle for years to come.\*

WHOLE FOOD NUTRIENT SOLUTIONS
