Foundational Support

Cod Liver Oil is part of the Standard Process line of omega-3 oils that supports general health and overall well-being. Careful processing ensures that Cod Liver Oil maintains its natural profile of vitamin A, vitamin D, and omega-3 fatty acids. Supportive but not conclusive research shows that consumption of EPA and DHA omega-3 fatty acids may reduce the risk of coronary heart disease.

Features of Cod Liver Oil:
- Helps to bridge the gap in dietary omega-3 intake*
- Supports general health and healthy inflammatory processes
- Supports immune system response
- Addresses vitamin A and vitamin D deficiency
- Supports healthy eyes and skin
- Supports epithelial tissue
- Supports bone and tooth health
- Supports musculoskeletal system
- May support mood challenges and liver function*

Vitamin A and Vitamin D Deficiency

The body needs vitamins A and D to support the bones, eyes and liver, as well as cardiovascular and immune health. Vitamins A and D in sufficient amounts help keep the body active and healthy. Cod Liver Oil naturally contains vitamins A and D, making it the perfect supplement to address this deficiency.

Bridging the Gap in Dietary Omega-3 Intake

Omega-3 fatty acids play a critical role in the human body and regulate various functions in the cardiovascular, pulmonary, immune, nervous and endocrine systems.\(^1\,^2\) Since EPA and DHA are not made efficiently by the body, it is recommended that these polyunsaturated fatty acids (PUFAs) be consumed at higher levels in the diet. However, a large percentage of the U.S. adult population falls below the recommendations for omega-3 fatty acid consumption.\(^4\)

Standard Process Calamari Omega-3 Liquid helps bridge the dietary gap of omega-3 with 800 mg of DHA and 400 mg of EPA omega-3 fatty acids per serving.*

In-house scientists rigorously research, develop and test all products to ensure the highest quality.

Our ingredients are of high quality.

Our vertically integrated manufacturing processes ensure quality from start to finish.

High-Quality, Wholistic Clinical Nutrition

Since 1929, Standard Process has been dedicated to the field of nutritional supplements and the whole food philosophy introduced by Dr. Royal Lee.

We are committed to growing and sourcing only the highest quality ingredients. For products like our omega-3 oils that can’t be grown on our own organic farm, we go to great lengths to find sources that practice, sustainable methods and apply high-quality standards like we do.

Our EPA and DHA products are of the highest quality, which means:

- Below regulatory standards for contaminants and toxins
- Pure, high quality, concentrated oils
- Sustainably sourced ingredients
