GI Flora Balance Program

A 6-Week Protocol to Support Gastrointestinal Health*
Do you experience one or more of the following?
• Indigestion after eating
• Gas shortly after eating
• Stomach “bloating”
• Occasional loose stools

If so, you may be a candidate for the GI Flora Balance Program.

Digestion and Gastrointestinal Health
A well-functioning digestive and gastrointestinal (GI) tract is important to overall health and well-being. In fact, 70 percent of your immune system is made up of tissues located in your GI tract.

What is gut flora?
GI flora, also referred to as gut flora or gut microbiota, includes a diverse community of both good and bad bacteria in the GI tract. The gut plays host to more than 100 trillion microbial cells that may impact human physiology, metabolism, nutrition, and immune system function.

Factors That Affect Gut Flora
There are many factors that can affect an individual’s gut flora composition, including:
• Age
• Antibiotics
• Diet
• Nonsteroidal anti-inflammatory drugs (NSAIDS)
Core GI Flora Balance Program
A 6-Week Protocol to Support Gastrointestinal Health*

DiGest Forte (MediHerb)
• Supports healthy digestion and intestinal function
• Promotes healthy gastrointestinal tone*

Gut Flora Complex (MediHerb)
