Benefits From Standard Process Enzymes

- Support healthy digestion
- May help reduce bloating and indigestion
- Supports breakdown of macronutrients*

Digestive Support

Digestive concerns affect over 70 million Americans, requiring a visit to their health care provider annually. Many digestive concerns involve a reduction in the level of digestive enzymes that are endogenously being produced so that supplementation may be needed. Multizyme® provides a combination of digestive enzymes (pancreatin, bromelain, lipase, cellulose, papain and amylase) in addition to a whole food matrix of fig and almonds to support digestion at multiple levels, from a breakdown of macronutrients to supporting absorption of nutrients.

Enzymes

- **Pancreatin** is a mixture of pancreatic enzymes, including lipases, amylases and proteases: 
  - Protease is responsible for the breakdown of proteins and peptides to amino acids.
  - Lipase breaks down fats into fatty acids.
  - Amylase breaks down starches and glycogen into simple sugars.
- **Cellulase** breaks down cellulose, one of the components of plant lignocellulose, into sugar molecules.
- **Papain**, an endocytic plant cysteine protease enzyme found in papaya is a proteolytic enzyme that digests proteins.
- **Bromelain**, an endopeptidase from pineapple stems, has been shown in clinical studies to support healthy inflammatory response.

More than 80% of the raw plant ingredients used in our products are grown on our organic and sustainable farm.

Freshly picked crops are often processed within a day to maintain vital nutrients.

We harvest more than 6.5M pounds of ingredients on our certified organic and sustainable farm.

Standard Process is a family-owned company dedicated to making high-quality and nutrient-dense therapeutic supplements for three generations.

We apply a wholistic approach to how we farm, manufacture and protect the quality of our products. This comprehensive strategy ensures that our clinical solutions deliver complex nutrients as nature intended. It’s how we define the whole food health advantage.
