Olprimas™ EPA is a convenient softgel providing a high concentration of omega-3 (EPA).

Olprimas™ EPA promotes a balanced mood while supporting the body’s healthy inflammatory response and overall health.* Careful processing and rigorous testing ensures quality and purity of the product and provides 600 mg of EPA.

### Features of Olprimas™ EPA:
- Supports healthy triglyceride and HDL with minimal effect on LDL*^.
- Supports healthy inflammatory processes*.
- General mood support*.
- Omega fatty acids support healthy lifestyle.
- Monounsaturated and polyunsaturated fatty acids support general health.

### Supplement Facts

| Serving Size: 2 Softgels | Servings Per Container: 30
|-------------------------|------------------------
|                        | Amount per Serving     | %Daily Value |
| Calorie                 | 10                     |              |
| Total Fat               | 1 g                    | 2%*          |
| Fish Oil Concentrate    | 1200 mg                | 1            |
| Omega-3                 | 660 mg                 | 1            |
| Omega-6                 | 50 mg                  | 1            |
| Omega-7                 | 45 mg                  | 1            |
| Omega-9                 | 75 mg                  | 1            |
| EPA                     | 600 mg                 | 1            |

*Percent Daily Values are based on a 2,000 calorie diet. 
^Daily Value not established.

Other Ingredients: Gelatin, water, glycerine, rosemary, and astaxanthin.

Please consult the actual product label for the most accurate product information.

### How Olprimas™ Targeted DHA and EPA Supplementation Works

When used at the targeted ratio and dose, concentrated DHA and EPA, like Standard Process Olprimas, may improve specific clinical conditions in very different ways from foundational omega-3 supplementation typically used to maintain good health.8,7,10 Olprimas™ concentrated omega-3s can provide condition-specific support related to cardiovascular health^ and brain health and cognition.*

### The Case for Targeted Omega-3 Support

Omega-3 fatty acids play a critical role in the human body. DHA, EPA and their metabolites regulate a number of body systems including cardiovascular, pulmonary, immune, nervous1, and endocrine systems2,3 and when administered individually or together in a concentrated form at an optimal ratio and dose may improve specific clinical conditions in very different ways than foundational omega-3 supplementation.1,4,5

However, the Standard American Diet (SAD) often has an unbalanced and unhealthy omega-6 to omega-3 fatty acid ratio. The SAD has an overabundance of omega-6 fatty acids, found in poultry, nuts, eggs and vegetable oils, and an insufficient amount of omega-3 fatty acids. This high omega-6 and low omega-3 consumption can tip a healthy body system out of balance.

While scientific evidence from several clinical intervention studies has shown that intake of omega-3 fatty acids is associated with several beneficial health outcomes,2,6,7 it is only within the last several years that clinical studies have investigated the specific effects of EPA and DHA. EPA and DHA work individually and can also be combined with more targeted ratios to address condition-specific needs.8,9
Diet Alone May Not Be Enough

Increasing omega-3 fatty acid consumption through foods is preferable. However, a large percentage of the US adult population falls below the recommendations for omega-3 fatty acid consumption.\(^\text{10}\) Supplements can help bridge this gap.

**REFERENCES**

**High-Quality, Wholistic Clinical Nutrition**

Since 1929, Standard Process has been dedicated to the field of nutritional supplements and the whole food philosophy introduced by Dr. Royal Lee. We are committed to growing and sourcing only the highest quality ingredients. For products like our omega-3 oils that can’t be grown on our own organic farm, we go to great lengths to find sources that practice, sustainable methods and apply high-quality standards like we do.

**Our EPA and DHA products are of the highest quality, which means:**

- Below regulatory standards for contaminants and toxins
- Pure, high quality, concentrated oils
- Sustainably sourced ingredients
