

Delivering Health Solutions That Work

MediHerb was co-founded in 1986 by world-renowned phytotherapist, Professor Kerry Bone. In his words, "Our passion at MediHerb is to unlock the healing power of plants by combining the time-honored wisdom of traditional knowledge with sound clinical experience and the rigor of scientific research. This quest can only be attained by the total commitment to quality and continuous improvement which permeates every aspect of our endeavors."

In over 25 years of operation MediHerb has not only demonstrated an unwavering commitment to quality in herbal products, we have redefined it. We believe our unique approach to quality sets a standard for herbal products that is unsurpassed in the world today.

Kerry Bone and over 20 health care professionals work within MediHerb while still maintaining their own clinical practices. We know from our experience that the quality of a product you take makes a huge difference to the health outcome you experience. We dedicate ourselves to researching and making the best possible products to deliver you health solutions that work.

Saligesic

Clinically proven relief for discomfort*

Saligesic

MEDI HERB®

Saligesic – Powerful Herbal Relief for Discomfort

Pain after strenuous exercise is something we've all experienced. For many people, enjoying a game of golf, working in the garden and other strenuous tasks can lead to exercise-related joint pain and lower back discomfort that can take the joy out of everyday life.

Saligesic provides natural support to the body's normal inflammation response to strenuous exercise. It also supports normal joint function.*

You can have confidence in Saligesic, the safe and effective remedy specially formulated to relieve overall discomfort and restore freedom of movement after exercise.*

What is Saligesic?

Saligesic is a unique extract of Willow Bark, standardized for the important compound salicin.*

Willow Bark is the traditional herbal remedy that has been used for thousands of years. As early as 200 BC, Hippocrates (revered as the father of modern medicine) used the leaves and bark from the Willow tree. Native Americans also used Willow Bark.*

Traditionally, one ounce (28 grams) of Willow Bark was boiled in a pint of water and the liquid consumed over the period of a day. Remarkably, this dosage is almost identical to the clinically proven daily dose of 32 grams of Willow Bark that MediHerb recommends.*

Age-old wisdom has been validated by modern science. Clinical trials in Germany and Israel found that standardized extract of Willow Bark supported musculoskeletal health, particularly the knees, hips and lower back. Those taking part in the study found their normal mobility and flexibility improved. The daily dosage contained 120 to 240 mg of salicin – the amount contained in 2 to 4 Saligesic tablets.*¹

How is Saligesic Unique?

It's important to be aware that not all Willow Bark products are the same.

European clinical research shows that a high-potency salicin standardized extract of Willow Bark can powerfully support musculoskeletal health.*

MediHerb's superior quality Saligesic contains the important plant compounds of Willow Bark: phenolic glycosides (including salicin), flavonoids and others. To ensure optimal strength and quality, Saligesic is standardized to contain not less than 60 mg of salicin per tablet.*

We test the quantity of salicin in Saligesic raw materials and ensure the salicin is retained in the product throughout the manufacturing process. It is the same extract that was used in European clinical trials.*

Who Needs Saligesic?

If you enjoy being active, but dread the discomfort it can bring on, Saligesic is for you. Saligesic provides significant support for musculoskeletal health, helping you be active and live life to the fullest!*

MEDI  HERB®

Clinically Effective

Saligesic's unique compounds work to:

- Ease the discomfort of exercise-related aches and pains
- Support musculoskeletal system health
- Promote relaxation in muscle tissue
- Maintain and support healthy joints
- Promote vitality and stamina*

Ask your health care professional today if Saligesic is the right musculoskeletal support product for you. They will also inform you of any cautions to be aware of when taking this product.*
