Heart Health

The omega-3 fatty acids DHA and EPA support normal lipid profiles already within a normal range. Supportive but not conclusive research has shown that EPA and DHA omega-3 fatty acids may also reduce the risk of coronary heart disease.*

These products contain both DHA and EPA omega-3 fatty acids and may support the heart health of your patients.*

Features of Tuna Omega-3 Oil and Chewable:
- Supports general health and helps bridge the gap in dietary omega-3 intake*
- Supports normal lipid profiles within normal range
- Supports the body’s natural inflammatory response function as it relates to periodic challenges like consumption of high-fat meal or strenuous activity
- Supports cognition
- Supports skin and hair health
- Supports emotional balance*

Foundational Support

Tuna Omega-3 is part of the Standard Process line of omega-3 oils that supports general health and overall well-being. Careful processing ensures that it maintains its natural profile of tuna oil, rich in essential omega-3 fatty acids.

NOTES

- Please consult the actual product label for the most accurate product information.
Bridging the Gap in Dietary Omega-3 Intake

Omega-3 fatty acids play a critical role in the human body and regulate various functions in the cardiovascular, pulmonary, immune, nervous1 and endocrine systems.2,3 While these essential fatty acids are key in helping the body to run smoothly, our bodies do not produce them and must, therefore, be obtained from diet. However, a large percentage of the U.S. adult population falls below the recommendations for omega-3 fatty acid consumption.4 Standard Process Tuna Omega-3 Oil and Tuna Omega-3 Chewable help bridge the dietary gap of omega-3 with both DHA and EPA.

High-Quality, Wholistic Clinical Nutrition

Since 1929, Standard Process has been dedicated to the field of nutritional supplements and the whole food philosophy introduced by Dr. Royal Lee. We are committed to growing and sourcing only the highest quality ingredients. For products like our omega-3 oils that can't be grown on our own organic farm, we go to great lengths to find sources that practice, sustainable methods and apply high-quality standards like we do.

Our EPA and DHA products are of the highest quality, which means:
- Below regulatory standards for contaminants and toxins
- Pure, high quality, concentrated oils
- Sustainably sourced ingredients
