From wagging tails to warm snuggles, pets make our lives better and brighter. Their well-being deserves more than an annual wellness exam. It deserves Standard Process Veterinary Formulas. Since 1929, Standard Process has been the visionary leader in whole food nutrient solutions. We partner with health care professionals to ensure patients — including animals — receive a holistic approach to nutrition for optimal health.

Standard Process believes that, when given the proper nutrition, your pet has the amazing ability to heal itself. We also believe that nutrition should be individualized to meet each pet’s needs.
The Standard Process Difference

Dogs, cats, and horses have nutritional needs beyond what their regular diets provide. These unique needs change based on age, activity level, and health status. Standard Process Veterinary Formulas™ were created to fill these potential nutritional gaps. The goal of whole food-based supplementation is to provide nutrients for the body that are as close as possible to how they are found in nature. After all, it is in this whole food state that nutrition is typically harnessed and presented to the body.

Offered through qualified veterinary professionals, Standard Process Veterinary Formulas utilize the same state-of-the-art manufacturing processes and high-quality ingredients used to produce our human supplements. That’s because we believe what is good for us is also good for our pets.

Achieving Holistic Health Through Nutritional Supplements

The key to pets’ optimal health is a diet rich in a variety of complex nutrients. The ingredient combinations in Standard Process Veterinary Formulas provide a spectrum of nutrients to support multiple organs and systems in the body.

Our complex, whole food-based veterinary formulas combine targeted nutrients sourced from raw plant ingredients, organ and glandular tissue, and specialized protein extracts.

Whether you’re looking for everyday wellness or targeted system support, we have a formula designed with your pet’s needs in mind.

Our Veterinary Formulas Support a Variety of Body Systems

The ingredient combinations in Standard Process Veterinary Formulas provide a spectrum of nutrients to support multiple organs and systems in the body.
