Digestive Support

Digestive concerns affect over 50 million Americans, requiring a visit to their health care provider annually. Many digestive concerns involve a reduction in the level of digestive enzymes that are endogenously being produced, so supplementation may be needed. As people age, their level of pepsin – an enzyme that breaks down protein – and gastric acids decline, which can contribute to dysbiosis and a rise in challenging organisms.

Stomach Acid Support*
- Hydrochloric acid (HCl) is key in protein digestion
- Supports vitamin and mineral absorption
- Supports healthy gut microbiome*

Benefits From Standard Process Enzymes*
- Support healthy digestion
- Support for age-related digestion concerns
- May help with bloating and indigestion
- Breakdown of macronutrients*

Features of Zypan®:
- Gluten-free
- Non-dairy formula
- Macronutrient digestion support*
- Stearic acid to coat the pancreatin, helping it to be digested in the correct area of digestive tract*

FIGURE 1. How Zypan® supports the environment of the GI tract to facilitate healthy digestion.*

- Bovine pancreas Cytosol™: Supports healthy function of the pancreas*
- Betaine HCl: Supports pH balance in the stomach*
- Pancreatin: Supports breakdown of protein and fats*

Supplement Facts

<tr>
<td>Betaine hydrochloride, bovine pancreas Cytosol™ extract, pepsin (1:10,000), pancreatin (3X), stearic acid (vegetable source), ammonium chloride, bovine spleen, and ovine spleen.</td>
</tr>
</tbody>
</table>

†Daily Value not established.

Other Ingredients: Cellulose and calcium stearate.

Available Sizes:
- Zypan® 90T
- Zypan® 330T

NOTES
More than 10,000 pounds of ingredients are grown on our certified organic and sustainable farm.

### Additional GI Support

- A-F Betafood®
- ProSynbiotic
- Whole Food Fiber
- Cholacol®
- Okra Pepsin E₃
- MediHerb® DiGest Forte

### REFERENCES

Standard Process is a family-owned company dedicated to making high-quality and nutrient-dense therapeutic supplements for three generations.

We apply a wholistic approach to how we farm, manufacture and protect the quality of our products. This comprehensive strategy ensures that our clinical solutions deliver complex nutrients as nature intended. It’s how we define the whole food health advantage.
