## For Healthy Digestive Support

Like many Americans, your days are incredibly busy — so busy that high-quality nutrition can sometimes become less of a priority. While fast food might be one challenge that your body faces, it's not the only one; important digestive levels often decrease as the body ages.<sup>1</sup> When this happens, proper supplementation may give the body the support it needs.

## How Zypan® supports the digestive GI tract environment

○ **Betaine HCl**  
Hydrochloric acid is involved in maintaining proper gastric pH

○ **Supports macronutrient  
digestion\***  
with Pepsin & Pancreatin

*Zypan® combines key ingredients — pancreatin, pepsin, and betaine hydrochloride — to support the GI tract environment and encourage healthy digestion.\**

## Zypan®

**Suggested Use:** Two tablets with each meal, or as directed. Chewing this product is not recommended.

- Supports macronutrient digestion\*
- Contains hydrochloric acid, which is involved in maintaining proper gastric pH
- Includes stearic acid to coat the pancreatin, helping it to be digested in the correct area of the digestive tract
- Provides enzymatic support for protein digestion
- Supports the digestive environment of the GI tract\*
