At our office, we believe that given the proper nutrition, your body has the amazing capability of keeping itself healthy. We also believe that nutrition should be individualized to meet each patient’s needs.

For these reasons and many more, we proudly recommend Standard Process whole food supplements.

EpiCor®:
Embria Health Sciences has undertaken human trials to evaluate the efficacy of EpiCor at 500mg/daily. A list of all studies is available at: http://www.embriahealth.com/epicor_sciences_studies.asp

Maitake:

MaitakeGold 404® is a trademark of the Tradeworks Group, Inc. and is protected under U.S. Patent 5,854,404.
EpiCor® is a registered trademark of Embria Health Sciences, L.L.C.
As you go along with your superhero responsibilities, your immune system does a balancing act, keeping microscopic invaders at bay. But stress has a way of sneaking in and leaving you vulnerable to immune challenges.

Epimune Complex can help. It is a vegetarian supplement with a synergistic blend of mushrooms, a unique dried yeast fermentate containing beneficial metabolites, vitamins, and minerals used to “feed” the immune system for comprehensive year-round and targeted support. These ingredients, supported by research, are designed to aid the immune cells involved in normal immune system response.*

Epimune Complex:
♥ Helps support year-round respiratory health
♥ Helps activate and balance the immune system
♥ Promotes healthy immune function and cellular health
♥ Is a vegetarian alternative to other immune products*

Epimune Complex Ingredients Power Up the Immune System
The main components of Epimune Complex, maitake (including MaitakeGold 404®) and Turkey Tail mushroom powders, used for centuries in Asian medicine, and a derivative of dried, fermented Brewer’s yeast (EpiCor®), provide a host of nutrients to target different aspects of the immune system to help support immune defense. Vitamin C, from acerola berries, calcium, and zinc all have a hand in contributing to the health of the immune system. Vitamin C aids in a healthy immune response; calcium assists with the proper functioning of white blood cells; and zinc supports the body’s natural healing function. For vegetarian immune support all year long, turn to Epimune Complex.

Epimune Complex can be used by itself or in combination with any of our other immune support products:
♥ Immuplex®
♥ Congaplex®

To find out whether Epimune Complex or another one of our immune support products is right for you, speak with your health care professional.
